Task 1: Digital Literacy Awareness Infographic

1. Introduction to Task 1 For this task, I took on the role of a Student Digital Ambassador to create a visual guide aimed at helping my peers navigate the digital landscape. The objective was to synthesize key concepts from Module 1 of the CSE0001 course into an accessible, one-page infographic. I focused on three critical areas: safe internet practices, professional online presence, and essential digital tools for engineering students.

2. Tools and Methodology To create this infographic, I utilized **Google Slides** integrated with **Gemini AI**.

- **Design Process:** I used a minimalist template from **SlidesCarnival** to ensure a professional layout.
- **AI Integration:** I used AI prompts to generate concise tips for "Email Etiquette" and "Phishing Awareness." I also used the "Help me create an image" feature to generate custom, royalty-free icons representing "Cyber Security" and "Global Connectivity" to ensure the visual elements were unique and relevant.
- **Final Output:** The final design was exported as a high-resolution PNG file and uploaded to the `task-1-presentation/` folder in my GitHub repository.

3. Reflection (150–200 words) Creating this infographic was an insightful exercise in data visualization and digital communication. One of the most

3. Reflection (150–200 words)

> Creating this infographic was on as an insightful exercise in iæ¤iuta. One of the most navigate the digital landscape. was the objective was to synthesize key concepts from Module I I focused 1 of the CSE0001 course into an accessible, one-page infographic. I focused on three crittical areas: safe internet practices, professional online presence, and tools for engineering students.

4. Evidence of Work

For this task, I took on the role of a Student Digital Ambassador to create a visual guide helping hy peers navigate fre digital landscape. The obective task-1-presentation/digital_literacy_infographic.png, on three crtical areas:

✔ Safe internet meret practices,
✔ Royality-free icon· representing
✔ Essential digital tools for engineering students.

NAVIGATING THE DIGITAL WORLD

A Student's Guide to a Secure, Professional, and Productive Online Presence

SAFE INTERNET PRACTICES

- Enable Two-Factor Authentication (2FA) on all important accounts.
- Create strong, unique passwords and use a password manager.

PROFESSIONAL PRESENCE

- Maintain a polished, up-to-date LinkedIn profile with a professional photo.
- Showcase coding projects and contributions on a well-organized GitHub profile.

DIGITAL PRODUCTIVITY TOOLS

- Utilize Canva for designing professional presentations and graphics.
- Collaborate and organize with Google Workspace (Docs, Sheets, Drive).
- Manage code and collaborate on projects using GitHub.
